

To: M+W Solar GmbH and GSI Geva Bot

Date: January 20 2017

With the requirement of our customer M+W Solar GmbH and ReneSola checked and evaluated GSI Geva bot company's cleaning process、 device data sheet、 brief introduction from official website released by GSI Geva Bot.

Herein, ReneSola clarifies that,

- 1) Wet cleaning method is recommended.
- 2) The volume of spout water and the rotation speed of the brush should be set on the premise that no visible abrasion on the module surface and no performance decline of module.

Please refer to relevant documents released by GSI Geva Bot for more detailed information.

Sincerely,
